

## **Iceland's Prophecy**

Years ago I was told to watch Iceland and what took place in Iceland would be a prophecy. Also I should relay what took place in Iceland to the United States and the world. At different times I would see the volcanoes explode in Iceland. A few years ago one exploded there and the ice that melted in Iceland made the second largest river in the world. The volcano that has exploded in Iceland now is saying this; it's shut down the economy in Europe.

The entire world is so tied together in one economic plate that it can't shake one place without it shaking another. I believe this is saying the economy is not finished with the shaking and hasn't even started. There's another volcano in Iceland and if it explodes you better get ready for the real shaking.

Two years ago Iceland went bankrupt. I wonder when the United States went bankrupt. I wonder when our dollar bills, that are nothing but IOU's, become worthless? So if we put our trust in these things we're going to be disappointed. If we put our trust in God you'll never be disappointed.

I think God is waiting for us to rise up because the religious spirit has reigned over the body of Christ long enough. It's now time for the Holy Spirit to reign over the body of Christ and bring us into a level of maturity where we can fly into the Son right up into our Father's arms.
